PROFESSIONAL PROFILE

A motivated and technically skilled final-year Computer Systems Engineering student at Tshwane University of Technology with hands-on experience in software development, system integration, ICT infrastructure, networking, and embedded systems. Experienced in developing and integrating applications using Python (Flask), JavaScript, REST APIs, and database technologies while supporting enterprise networking, cybersecurity, cloud services, and security infrastructure projects. Currently working as a Software Developer Intern, building and maintaining integrated systems, APIs, and business applications. Demonstrates strong analytical thinking, problem-solving abilities, and teamwork skills, with a passion for developing reliable, scalable, and innovative technology solutions.

TECHNICAL SKILLS

Software Development: Python, Flask, JavaScript, SQL, REST API Development, System Integration, Git&GitHub
Web & Database: Flask-SQLAlchemy, PostgreSQL, Database Design, API Integration, Backend Development
Infrastructure & Networking: TCP/IP, Routing&Switching, Linux Administration, Enterprise Networking, PABX&VoIP, Cloud Services (NaaS, IaaS, DaaS)
Security & ICT Systems: CCTV Systems, Video Management Systems, Access Control, Intrusion Detection, Cyber Security, Data Protection
Engineering & Embedded: PLC Programming, Robotics&Automation (ROS), Digital Electronics, Arduino
Professional Skills: Problem Solving, Team Collaboration, Leadership, Agile Development, Project Documentation

WORK EXPERIENCE

Software Developer Intern · Firmlinx (Pty) Ltd

March 2026 – Present | Emalahleni, Mpumalanga, South Africa · On-site

- Responsible for system integration across internal and external platforms, connecting frontend and backend systems using Python (Flask) and JavaScript.
- Develop, maintain, and optimize APIs to ensure seamless data flow between services and third-party applications.
- Collaborate with cross-functional teams to design scalable architectures, troubleshoot integration issues, and enhance system performance.
- Ensure secure communication between systems while improving overall application reliability and user experience.
- Participate in backend development, database integration, testing, deployment, and system maintenance activities.
- Contribute to business applications involving ticket management, integrations, reporting, notifications, and workflow automation.

  Technologies: *Python, Flask, JavaScript, SQL, PostgreSQL, REST APIs, Git, System Integration*

IT Technician Intern · Mctrends Systems

August 2025 – February2026 | South Africa · On-site

- Implemented and maintained integrated security and ICT infrastructure solutions.
- Worked with Advanced CCTV Systems, Video Management Solutions, Perimeter Protection, Access Control Systems, and Intrusion Detection Systems.
- Supported Remote/Offsite Monitoring and Security Systems Integration projects.
- Assisted with Enterprise Networking, Server and Data Centre infrastructure, Cyber Security, and Data Protection initiatives.
- Supported PABX&VoIP deployments, Cloud Services (NaaS, IaaS, DaaS), and Data Engineering projects.
- Contributed to infrastructure troubleshooting, maintenance, and technical support activities.

Technologies: *Networking, Cyber Security, CCTV Systems, Access Control, VoIP, Cloud Services*

Auto Electrical Assistant · Wellzz Auto

November 2019 – June 2022 | Randburg, South Africa

- Diagnosed and repaired electrical issues in motor vehicles.
- Performed battery testing, alternator and starter motor repairs, and wiring installations.
- Used diagnostic tools and software for vehicle fault-finding.
- Maintained tool inventory and ensured workshop safety compliance.
- Gained practical insight into vehicle electrical systems, teamwork, and workshop operations.

Reference: Thamsanqa | 065 865 9811 | thamue.wellzz@gmail.com

PROJECTS

Smart Locker Using Facial Recognition · Final Year Project

2025 – Present

- Designed and developed a smart locker system using facial recognition technology for secure access control.
- Integrated camera-based authentication with embedded hardware components.
- Implemented user verification and access management functionality.
- Applied principles of embedded systems, computer vision, and software-hardware integration.

Technologies: *Python, Embedded Systems, Facial Recognition, Computer Vision*

Systems&Integration Tracker · Firmlinx (Pty) Ltd

2026

- Developed and enhanced a web-based Systems&Integration Tracker platform.
- Implemented backend functionality using Flask and SQLAlchemy.
- Built integrations with external systems and third-party APIs.
- Developed dashboards, reporting tools, user assignment workflows, notifications, and file management features.

Technologies: *Python, Flask, SQLAlchemy, PostgreSQL, JavaScript, REST APIs*

EDUCATION

Diploma in Computer Systems Engineering (Extended) · Tshwane University of Technology

Pretoria, South Africa

- Specializations: Hardware&Software Systems
- Digital Electronics&Electronic Circuits
- PLC Programming (Ladder Logic, Instruction List)
- Robotics&Automation Systems (ROS)
- Networking (TCP/IP, Routing, Switching)
- Operating Systems (Linux-based)
- Programming: C++, C#, Assembly (PIC Assembler), SQL
- Tools: Arduino, Proteus, Processing

Cambridge International AS&A Levels · British International College

2019

- Subjects: Mathematics, Accounting, Business Studies, English

ZIMSEC Ordinary Level · Thekwane High School

2016

- Subjects: Mathematics, Computer Studies, Integrated Science, English Language

INTERESTS

- Software Development and System Integration
- Cloud Computing and Cyber Security
- Robotics and Automation Technologies
- Artificial Intelligence and Machine Learning
- Electrical System Innovation and Troubleshooting
- Mentoring Peers and Community Development
